

2K InvisibleProtect

Invisible surface protection

Inspired by natural wood – invisible protection

If you walk on it barefoot, you'll just love it! High-quality and innovative raw materials are the key to making 2K InvisibleProtect a truly unique surface coating. The wood looks and feels untreated and offers you all the protection of a finished floor. High durability and easy cleaning combine to make 2K InvisibleProtect the perfect surface treatment for all lovers of natural wood.

Why end users are convinced of 2K InvisibleProtect:

- Invisible protection – the look, feel and color of the wood remain as if it was untreated
- Long-lasting natural beauty – high resistance to mechanical wear and household chemicals
- Simple and convenient cleaning
- Very low emission
- Time saving – light use after 24 hours, fully resistant after only 5 days

Why contractors are enthusiastic about 2K InvisibleProtect:

- Excellent application performance – safe and easy to use
- Full build-up in two layers, no primer needed
- Very low emission, EMICODE® EC1 PLUS R
- Low VOC, GISCODE W2/DD+
- Certified slip resistance according to DGUV Rule 108-003 (formerly BGR181) according to DIN 51130, evaluation group R9

Special feature

2K InvisibleProtect is a unique surface treatment. In addition to being invisible, it also feels incredibly like untreated wood. The latest generation of raw materials guarantees that the floor will be long-lasting and will not be polished up even under heavy wear.

Range of use

Suitable for wood and cork floors. For heavy traffic residential areas and commercial use.

Stress level
Art.-no. 11474
Available in 1kg and 5kg
GISCODE W2/DD+
