For all areas of life: Viva!
VivaPrime & Viva

LOBA
On Top!

Excellent resistance – ideal for renovations!

The Viva product system is user friendly and has very low emissions. With the new VivaPrime the Viva system is now complete and is perfectly suited for a wide range of applications. In addition, it comes at a great value.

LOBA – Your partner for surface finishing and care

Why **end users** are convinced of the Viva products:

- Excellent resistance to household chemicals
- Long-lasting beauty due to high resistance
- Particularly low-emission products
- Proven worldwide for renovations and new installations
- Great price / performance ratio

Why **contractors** are enthusiastic about the Viva products:

- First-class processing properties – simple and safe application
- Excellent price / performance ratio
- Very low emissions, EMICODE® EC1 PLUS and low VOC content, GISCODE W2+
- Maximum application safety for renovations and new installations
- Highly resistant to plasticizers from flooring adhesives
- Part of the LOBA Wakol – Connected Systems

Special features

The new Viva system accommodates a variety of uses and both products are perfectly matched. They are extremely easy to use, are water-based, and very eco-friendly. Given their excellent resistance to plasticizers used in flooring adhesives, VivaPrime and Viva are especially suitable for renovations.

Range of use

VivaPrime and Viva can be used on light-colored European and North American wood species such as maple, birch, spruce, white oak, red oak, ash, and pine. The set-up is ideal for new installations and renovations. Suitable for normal to heavy traffic in residential areas and light commercial use.
