Glossar

DIBt

For reasons of health protection, the German Institute for Building Technology (DIBt) requires a general building supervisory approval for all building products used for the treatment and bonding of parquet on site. Certified building materials are marked with the Ü symbol. This obligation to obtain approval has been in force in Germany since 1 January 2011. In order to obtain approval, compliance with emission limits must be proven and the formulations must be disclosed to the DIBt. www.dibt.de

2004/42/CE

The "Decopaint-Directive" is a limitation of volatile organic compounds (VOC)* proclaimed by the EU due to the use of organic solvents in certain paints and varnishes.

Contents

The Detergents Ordinance harmonises regulations for the marketing of detergents and surfactants. In particular, the biodegradability of surfactants in detergents, the labelling of detergents, including allergenic fragrances, and information to be provided by manufacturers to the competent authorities of the Member States and medical personnel are important. In Germany, the Laundry & Home Care Act refers to this Regulation. The Robert Koch Institute is the central collection point for manufacturer information.
