Glossar

DIBt

For reasons of health protection, the German Institute for Building Technology (DIBt) requires a general building supervisory approval for all building products used for the treatment and bonding of parquet on site. Certified building materials are marked with the Ü symbol. This obligation to obtain approval has been in force in Germany since 1 January 2011. In order to obtain approval, compliance with emission limits must be proven and the formulations must be disclosed to the DIBt. www.dibt.de

AirQuality Seal

Products that meet LOBA's Air Quality Seal meet interior emission criteria

- of the California Section 01350 specification,
- the Collaborative for High Performance Schools (CHPS),
- the Indoor Advantage Gold™ Certification and
- the FloorScore label for low-emission elastic and hard floor coverings

Contents

The Detergents Ordinance harmonises regulations for the marketing of detergents and surfactants. In particular, the biodegradability of surfactants in detergents, the labelling of detergents, including allergenic fragrances, and information to be provided by manufacturers to the competent authorities of the Member States and medical personnel are important. In Germany, the Laundry & Home Care Act refers to this Regulation. The Robert Koch Institute is the central collection point for manufacturer information.
