Transparent

Oil impregnation for wood surfaces in outdoor areas

Emissions

The required limits of elucidable
Heavy metals and elements are completely adhered to.

According to DIN EN 71-3: 2018-08 (Category III according to
Table 1)

Technical evaluation

Contents

aliphatic hydrocarbons, modified vegetable oils, siccatives, water, cobalt-free siccatives

Glossar

EN 71-3

DIN EN 71-3 specifies requirements and test methods for the migration of the elements antimony, arsenic, barium, cadmium, chromium, lead, mercury and selenium from toy materials and parts.

Contents

The Detergents Ordinance harmonises regulations for the marketing of detergents and surfactants. In particular, the biodegradability of surfactants in detergents, the labelling of detergents, including allergenic fragrances, and information to be provided by manufacturers to the competent authorities of the Member States and medical personnel are important. In Germany, the Laundry & Home Care Act refers to this Regulation. The Robert Koch Institute is the central collection point for manufacturer information.
