Glossar

DIBt

For reasons of health protection, the German Institute for Building Technology (DIBt) requires a general building supervisory approval for all building products used for the treatment and bonding of parquet on site. Certified building materials are marked with the Ü symbol. This obligation to obtain approval has been in force in Germany since 1 January 2011. In order to obtain approval, compliance with emission limits must be proven and the formulations must be disclosed to the DIBt. www.dibt.de

Singapore Green Label

The Singapore Green Label is awarded by the Ministry of the Environment in Singapore and distinguishes environmentally friendly products through 'Green Labelling'. In order to be certified as an environmentally friendly product, very strict limit values must be adhered to, especially for the solvent content. In addition to a recipe check, continuous quality control during production is another prerequisite. www.sec.org.sg

US Regulatory VOC

Article 1113 was adopted in September 1977. The aim of this regulation is to limit the content of volatile organic compounds (VOCs) in architectural paints. Any person who supplies, sells, offers for sale or manufactures architectural coatings for use in SCAQMD must comply with the current VOC standards.
